WE ARE EVERYWHERE

Our Products

Coffee Green Bean

Indonesia is renowned for its exceptional coffee varieties with unique flavors from different islands. We offer both Arabica and Robusta green beans, available in full-washed and semi-washed processes.

Our Varieties:

Arabica Green Bean

Grown in highland regions such as Sumatra, Java, and Toraja. Known for its fruity, floral aroma and medium acidity that suits specialty coffee markets.

Robusta Green Bean

Cultivated in lowland areas like Lampung, Bengkulu, and East Java. Characterized by a strong body, bold taste, and earthy notes, perfect for espresso blends.

Luwak Coffee

Luwak coffee is one of the rarest and most exclusive coffees in the world, produced from beans that have been eaten, digested, and naturally fermented by the Asian palm civet. Sourced from Indonesia, this coffee is known for its smooth, low-acidity flavor and unique aroma profile.

Key Benefits:

-  **Naturally Fermented**
The digestion process enhances flavor depth and reduces bitterness.
-  **Smooth & Low Acidity**
Ideal for sensitive stomachs and refined palates.
-  **Unique Aroma & Taste**
Earthy, chocolaty, and complex with a clean aftertaste.

WE ARE EVERYWHERE

Cocoa Beans

We offer premium-quality cocoa beans from Indonesia, available in both fermented and non-fermented types. Each type comes in two classifications: Grade A and Super Grade, ensuring flexibility for different production standards and flavor requirements. Fermented beans are ideal for rich, full-bodied chocolate, while non-fermented beans maintain a more natural, earthy profile.

Fermented
Cocoa Beans

Non Fermented
Cocoa Beans

Cocoa Powder

Our cocoa powder is derived from high-quality Indonesian cocoa beans. We offer a wide range of grades to suit different industry needs, from baking to beverage production.

Low Grade 5-8% Fat: DIVES

Standard Grade 10-12% Fat:
DIVES

Medium Grade 10-12% Fat:
DRITTO

Premium Grade 10-12% Fat:
DRITTO

Cocoa Butter

Cocoa butter is the natural fat extracted from high-quality Indonesian cocoa beans. With its smooth texture and mild chocolate aroma, it is widely used in chocolate production, cosmetics, and skincare formulations.

Key Benefits:

-  **Essential for Chocolate Making**
Provides smooth texture, glossy finish, and melt-in-mouth feel in premium chocolates.
-  **Rich in Antioxidants**
Contains vitamin E and other compounds that help protect and nourish the skin.
-  **Natural Moisturizer**
Deeply hydrates and softens skin — ideal for lotions, creams, and balms.

Cocoa Mass

Asia Trade Office offers premium Indonesian cocoa mass available in Grade 1, 2, and 3. Produced from carefully selected cocoa beans, our cocoa mass delivers a rich chocolate flavor and smooth texture, ideal for confectionery, baking, and beverage applications. Consistent quality and natural aroma make it a reliable choice for manufacturers worldwide.

Cocoa Nibs

Asia Trade Office offers high-quality Indonesian Cocoa Nibs (60%), produced from selected, fermented cocoa beans. Our nibs deliver an intense cocoa aroma and natural chocolate flavor, suitable for manufacturing cocoa mass, chocolate products, bakery items, and beverage applications.

Palm Oil & Shortening

Palm Oil

Palm oil is a versatile vegetable oil extracted from the fruit of oil palm trees. It is widely used in food production, cosmetics, personal care products, and industrial applications due to its stable quality, long shelf life, and high yield per hectare.

Palm Oil Shortening

Palm oil shortening is a solid fat product made from refined palm oil, widely used in baking and food manufacturing. It provides excellent texture, stability, and consistency, making it ideal for pastries, biscuits, cakes, and frying applications.

RBD Palm Olein & HPKO

RBD Palm Olein

RBD Palm Olein is high-quality palm oil that has undergone a comprehensive refining process to ensure purity, stability, and neutrality in taste and aroma. The process includes refining to remove impurities, bleaching to eliminate natural pigments, and deodorizing to produce a clean, odorless oil.

Hydrogenated Palm Kernel Oil (HPKO)

Hydrogenated Palm Kernel Oil (HPKO) is a premium-grade vegetable oil derived from palm kernel oil that has undergone a hydrogenation process to enhance its stability, texture, and shelf life. This process converts unsaturated fats into saturated fats, resulting in a semi-solid to solid fat with improved resistance to oxidation.

Black Pepper

Indonesia is one of the top producers of black pepper, known for its high piperine content and bold flavor. We supply high-quality whole and ground black pepper suitable for both culinary and industrial uses.

- ✓ Enhances Flavor Naturally
- ✓ Supports Digestive Health
- ✓ Versatile for Culinary & Industrial Use

Our black pepper is sourced directly from trusted Indonesian farmers and processed with strict quality standards. Available in bulk packaging, suitable for wholesalers, spice brands, and food industries.

White Pepper

Our white pepper is produced from ripe pepper berries that are soaked, peeled, and sun-dried to achieve a smooth, pale appearance and a milder, earthy flavor. It is widely used in light-colored sauces, soups, and gourmet spice blends.

✓ Milder Taste, Clean Aroma

✓ Rich in Piperine

✓ Used in Culinary & Food Industry

We offer white pepper in whole and ground form, sorted and processed to meet international standards. Available in bulk packaging for spice importers, food manufacturers, and gourmet brands.

Long Pepper

Indigenous to Indonesia, long pepper (*Piper retrofractum*) is a rare and valuable spice known for its complex heat and aroma. Used for centuries in traditional cooking and medicine, it's now gaining popularity in gourmet and wellness markets.

- ✓ Unique Spicy Flavor Profile
- ✓ Traditional Medicinal Use
- ✓ Supports Respiratory Health

Our long pepper is sun-dried and hand-selected for quality, available in whole form. Supplied in bulk packaging for spice traders, herbal product makers, and gourmet food brands.

Cloves

Sourced from the rich volcanic soils of Indonesia, our cloves are hand-picked and sun-dried to preserve their strong aroma and high oil content. Used globally in culinary, pharmaceutical, cosmetic, and tobacco industries.

Key Benefits:

-  **Natural Antiseptic and Antibacterial**
Contains eugenol, a powerful compound that helps fight germs and bacteria.
-  **Relieves Toothache and Oral Pain**
Widely used in traditional medicine for dental care and oral hygiene.
-  **Rich in Antioxidants**
Helps combat oxidative stress and supports overall wellness.

Sugar Control

Vanilla

Our vanilla is cultivated in selected regions of Indonesia, hand-pollinated and sun-cured to develop its signature deep aroma and sweet, floral flavor. Recognized globally for its quality, Indonesian vanilla is prized by gourmet brands and natural product manufacturers.

Key Benefits:

-  **High Vanillin Content**
Contains potent vanillin compounds, offering strong scent and long-lasting flavor.
-  **Used in Food & Beverage Industry**
Perfect for ice cream, bakery, chocolate, syrups, and specialty drinks.
-  **Sought After in Cosmetics & Fragrance**
Used in perfumes, lotions, and aromatherapy for its calming and luxurious scent.

Dried Ginger

Our dried ginger is carefully sourced from selected farms in Indonesia and dried naturally to preserve its aroma and bioactive compounds. It is widely used in the culinary, herbal, pharmaceutical, and cosmetic industries.

Our dried ginger slices are sun-dried with care, retaining strong aroma and golden color. Available in bulk packaging, ready for export to wellness brands, food manufacturers, and herbal companies.

- ✔ Supports Immune Function
- ✔ Relieves Nausea and Digestive Discomfort
- ✔ Anti-Inflammatory Properties
- ✔ Versatile Ingredient

Dried Turmeric

Our dried turmeric is sliced from freshly harvested roots and sun-dried to preserve its deep golden color and active compound, curcumin. It's widely used in culinary, herbal, and wellness industries for its earthy flavor and health-boosting properties.

Key Benefits:

Natural Anti-Inflammatory

Rich in curcumin, known to reduce inflammation and support joint health.

Natural Food Coloring & Flavor

Provides bright yellow color and warm, bitter flavor to dishes and spice blends.

Ideal for Health Products

Used in teas, herbal capsules, extracts, and traditional remedies like jamu.

Nutmeg

Our nutmeg is harvested from the renowned spice-producing regions of Indonesia. Hand-picked and sun-dried, it is valued for its rich aroma, warm flavor, and essential oil content. Carefully cleaned and packed for export to spice traders, oil distillers, and food manufacturers.

Coconut

Coconut Powder Low Fat

Our coconut powder is made by spray-drying fresh coconut milk into a fine, shelf-stable powder. It delivers the creamy flavor of real coconut milk and is ideal for instant beverages, cooking, and baking applications.

Dessicated Coconut Powder High Fat

Our dessicated coconut is made from freshly grated, high-quality coconut meat that is gently dried to preserve its natural flavor and nutrients. It is unsweetened, additive-free, and available in various cuts: fine, medium, and coarse — ideal for culinary and industrial use.

Mace

Mace is the lacy, red outer covering of the nutmeg seed, hand-harvested and sun-dried to a vibrant golden-orange color. It offers a warm, slightly sweet flavor and is highly valued in spice blends, gourmet foods, and traditional remedies.

Key Benefits:

-  **High Essential Oil Content**
Valued in the food, cosmetic, and fragrance industries for its rich natural oils.
-  **Rich, Distinctive Flavor**
Offers a more delicate and aromatic taste compared to nutmeg — ideal for baking, sauces, and spice blends.
-  **Premium Culinary Ingredient**
Popular in gourmet kitchens, especially in European, Indian, and Middle Eastern cuisines.

Cardamom

Our cardamom is carefully harvested and sun-dried to preserve its intense aroma and citrusy, herbal flavor. This premium spice is widely used in culinary, beverage, and wellness products across global markets. Available in bulk packaging for spice distributors, tea companies, and health food producers.

Key Benefits:

-  **Bold & Aromatic Flavor**
Adds a unique warm, sweet, and slightly minty taste to both sweet and savory dishes.
-  **Popular in Beverage**
Commonly used in chai, herbal teas, and flavored coffee or milk drinks.
-  **Digestive Support**
Traditionally used to ease bloating, nausea, and support gut health.

Stevia and Rosella

Dried Stevia Leaf

Our stevia leaves are naturally grown and dried in Indonesia, retaining their intense sweetness and green color. Stevia is a natural, zero-calorie sweetener widely used in food, beverage, and health industries as a sugar alternative.

Dried Rosella

Our dried rosella petals are harvested from fertile Indonesian lands and naturally sun-dried to retain their vivid color and tangy taste. Rosella is widely known for its health benefits and is commonly used in teas, health drinks, and herbal formulations.

Gum Damar

Sourced from the forests of Sumatra, our gum damar is a natural tree resin known for its versatility in industrial, cosmetic, and artistic applications. It is collected sustainably and sorted by grade to meet various international market needs.

Herbal Tobacco

Our herbal tobacco is crafted from selected Indonesian herbs and leaves, offering a nicotine-free and chemical-free alternative for conscious consumers. It provides a smooth, aromatic experience and is used for shisha blends, incense, and wellness-focused smoking products.

We supply loose herbal tobacco blends or bulk-packed for private label needs. Customizable blends and flavors available upon request for shisha lounges, wellness brands, and herbal product companies.

✓ Smooth, Aromatic Smoking Experience

✓ Safe Alternative for Wellness Markets

✓ Flexible for Blends & Private Labels

Shisha & BBQ Charcoal

Shisha Briquettes

Our shisha briquettes are made from high-quality, natural Indonesian coconut shell designed for smooth, clean, and long-lasting heat. They are 100% chemical-free, odorless, and ideal for premium hookah or shisha sessions.

BBQ Charcoal

Our BBQ charcoal are produced from premium-quality Indonesian coconut shell and hardwood charcoal, offering consistent heat and eco-friendly grilling performance. They are chemical-free, long-burning, and ideal for home, commercial, or outdoor BBQ use.

Coconut Shell Charcoal

Coconut shell charcoal is a high-quality, eco-friendly fuel made from natural coconut shells. It has high carbon content, burns longer with strong and stable heat, and produces low ash and minimal smoke. Ideal for shisha, BBQ, and industrial use.

Key Benefits:

-  **Low Smoke & Odor**
Burns cleanly without altering food or shisha
-  **High Heat Value**
Long burning time with consistent heat
-  **Low Ash Residue**
Leaves behind minimal ash, ensuring cleaner use and easier maintenance.

Coconut Shell

Coconut shell is the hard, outer layer of the coconut fruit, widely used as a sustainable raw material for producing charcoal and briquettes. It is eco-friendly, renewable, and has excellent burning properties—making it ideal for shisha, BBQ, and industrial use.

Key Benefits:

-  **Low Smoke & Odor**
Burns cleanly without altering food or shisha flavors.
-  **High Heat Value**
Produces intense and consistent heat, perfect for long-lasting burns.
-  **Low Ash Residue**
Leaves behind minimal ash, ensuring cleaner use and easier maintenance.

Palm Kernel Shell & Fibre

Palm Kernel Shell

Palm kernel shell is a hard, natural by-product of palm oil processing, widely used as a renewable biofuel. It has high calorific value, low moisture content, and strong combustion efficiency, making it suitable for boilers, power plants, and industrial heating.

Palm Fibre

Palm fibre is a natural biomass material derived from the processing of palm oil fruit. It is widely used as a renewable fuel source due to its good calorific value and easy combustion properties, making it suitable for boilers and industrial energy production.
